PROJECTS

Retail Business Intelligence: Olist E-Commerce Analytics — Power BI | DAX | SQL | Python

- Analyzed 99,441 orders across 9 relational tables with Python, PostgreSQL, and 27 SQL queries using CTEs and window functions (LAG, RANK, NTILE).
- Built a Power BI dashboard tracking revenue (R$13.59M), average order value, review score, and delivery performance; found reviews average 4.3 stars for on-time orders vs 1.7 for deliveries over 5 days late and recommended realistic delivery estimates.

India Tech Jobs 2026: Natural Language to SQL Portal — Python | PostgreSQL | LLM | Django

- Built an LLM-based tool (OpenRouter) that converts plain-English questions to PostgreSQL with validation checks; benchmarked it against 23 hand-verified queries (69.6% correct).
- Analyzed 23,201 job listings and found 88% omit salary, correcting averages from 1.8 to 15.3 LPA.

HR Attrition Analysis Dashboard — Advanced Excel | 7,500+ formulas

- Cleaned 1,470 employee records and built KPI and dashboard sheets using COUNTIFS, SUMIFS, AVERAGEIFS, INDEX/MATCH, and charts; found overtime workers left at 30.5% vs 10.4% for others, with limitations documented.

Pet Hospital Booking System — Python | Django | HTML | CSS | JavaScript | Gemini API

- Built a three-module booking application (Customer, Hospital, Admin) with a Gemini API chatbot answering pet-care questions.
